Re: Monthly Updates for the Board of Education

Hello everyone,

Kim Sullivan, International Student Advisor, wanted to let the Board know about the International Culture Night event coming up on May 4th. The event starts at 6pm with performances starting at 7pm. This will be a show of talent and fashion from around the world and a night to experience and discover culture! Please come check it out if you can!

Paul Tannahill, eLearning Systems Administrator, recently designed a process that enables our active Moodle course shells to be scanned for accessibility issues in a way that will make it easy to identify and fix those issues.

The Classified Association has started an Innovation Committee that will focus on collaboration for projects and ideas across Departments. We have a lot of highly skilled people in their areas of expertise and creating opportunities for us to make connections and help each other by bringing different perspectives together has the potential to have a huge impact on the work we do for our Community. I'll be sharing more about this as it moves forward but wanted to introduce the idea to you now that we have officially moved from the planning discussions to having this Committee established. Our meetings, the first of which is this month, will take place at a table in the Commons during lunchtime and will be a place that people can come to connect with and offer ideas to help each other.

Thank you,

Kevin
