

Fall 2021
GS 106: Physical Science –Principles of Earth Science

Welcome to Earth Science!

Earth's processes and issues are in the news today; with volcanic eruptions, earthquakes and tsunamis, dwindling resources, climate change and the drive for cleaner energy production, Earth Science is more relevant than ever.

Instructor: Sheila Alfsen email: alfsens@linnbenton.edu

Date Range: Start 09/27/21 End: 12/12/21

Place: Online

Credit: 4 hours

Prerequisites: None

CRN 24991

Contact Information: Contact me any time by email with questions or concerns. I have a Zoom room set up for face to face consultations if you have any questions or want to meet with me. Help is available for labs too. Look for the link in the Introductory Folder of your Moodle course.

Course Description: An overview of our fascinating planet designed for non-science majors who are interested in the natural world. We will study the rocks that make up Earth's crust, Earth's history, the interior of the Earth, landscapes, the oceans and atmosphere, weather, climate and energy resources. This class satisfies the physical science requirement for the AAOT and AS degrees.

Student Learning Outcomes

1. Identify and classify igneous, sedimentary, and metamorphic rocks.
2. Describe the formation of landforms in the context of plate tectonic theory.
3. Describe the components and processes of the hydrologic system.
4. Describe the components and processes of the atmospheric system, including weather and climate.
5. Describe objects that make up the solar system and universe, and explain the effects of the relative positions of the earth, sun, and moon.

Online courses: Online courses are not for everyone. *This course is best suited for students that are highly self motivated.* It requires a high degree of self-discipline on a **weekly** basis. I expect you to know the basics of how to work a computer, word-processing/spreadsheet programs, and navigate the internet.

System Requirements: Computer with access to high-speed internet. *It is your responsibility to ensure that you have the correct computer requirements to participate in this course.*

Text and additional materials: *Foundations of Earth Science 8th ed.*, Lutgens/Tarbuck

You must also purchase:

- 1) GS106 Mineral Kit
- 2) GS106 Rock Study Kit

There is **NO** lab manual to be purchased for this course.

All materials required can be purchased from the campus bookstore in Albany.

NOTE: *(During this time of sheltering in place, the bookstore will send the materials to your home).*

eLearning- This class uses Moodle. You will find all of your course-materials listed by the week and will submit all assignments online. Log into your Moodle account by going to <http://elearning.linmbenton.edu/>

It is important that you update your Moodle profile with the email address you will check so I can be in contact with you!

Course set up: There are ten units you will work through, one for each week. Each unit has specific assignments (listed below) that **must be completed by due dates**.

Components of course:

- Readings from textbook
- Videos and video worksheets (due on Saturday nights)
- Labs and activities (done at home) (due on Saturday nights)
- Forum discussions (first post due Thursday, response to classmate Saturday nights)
- Exams (open only for a 4 day window of time, see schedule for weeks)

Reading from textbook: All readings are from the text book and are listed in each unit.

Videos: These are 30 minute videos that you will stream from the Earth Revealed website (<http://www.learner.org/resources/series78.html>). Scroll down the page to see the individual program descriptions and select the film/films that are required each week. Video worksheets will be in each unit for you to use as a guide while viewing the video.

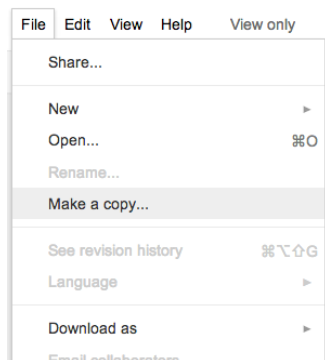

Submission instructions for video worksheets: You will submit the video worksheets via Moodle (they are part of your grade). Video worksheets will be submitted by copy/pasting your completed worksheet into the submission box. You will not be allowed to attach a file. I ask that your answers be in either **red** or **bold** font for clarity when I grade them.

Labs and Activities: There is **no lab manual** to purchase for this course. Labs and activities will be posted in each unit. They are done at home with your purchased materials and simple household items. A list of the simple materials that you need to provide is posted on the Moodle site below this syllabus to allow you time to obtain them. Help with labs is available through the Instructor’s Zoom Room found in the Introductory folder of your Moodle course.

Submission instructions for labs: For the labs, I will give you an option to submit them by attaching a file, in case submission by copy/pasting does not work. (sometimes images will not come through the submission box). I ask that your answers be in either **red** or **bold** font for clarity when I grade them.

Instructions for finding/saving video worksheets and labs in your Moodle course:

This course utilizes Google Docs to deliver course material to you. You will not be able to fill in your worksheets and labs unless you **save** the document(s) to your computer. Here’s how:

Step 1: Log into your **LBCC email account**.

Step 2: **Click here to view the worksheet/lab for this assignment.**
This will open in a new browser tab in Google Docs.

Step 3: File menu > Select “Make a copy”

- This will save a copy of the Google Doc that you can edit. Submit worksheets by copying and pasting them into the submission box. Submit labs by attaching the file.

Note: If you have trouble with Google Docs, the assignments are posted as Word documents in a folder at the end of each week. These are only to be used as a backup.

Forum discussions: To overcome the impersonal aspects of an online class, each week a forum discussion will be posted for you to contemplate and make a comment or question about. This is your chance to interact with your instructor and classmates. Each week you will be expected to:

- Post **one comment** addressing the question to the best of your ability. It may be an observation you have while studying the topic or an opinion you have. There is no one correct answer!
- Post **one response** to what another student has posted.

In order to receive full credit, post your initial response **no later than Thursday** of each week. This will give others ample time to read what you have posted and respond. *I expect you to participate in it each week as it is part of your grade.* Your participation during discussions and questions are important!

Forum Follow-ups: Towards the end of each week, I will post a follow-up to the weekly discussion to make sure you got the main points. You don't need to reply to it, but be sure to read them each week. They will help you prepare for the final exam.

Exams/Quizzes: There are three exams: two mid-terms and one comprehensive final. Exams will be taken online with a time limit. Make sure you are thoroughly prepared (re-read chapter, completed all homework, viewed films, etc.) before you log on for the exam. Make use of the "Concepts in Review" sections at the end of each chapter to study. You need to be very familiar with the content before going into an exam, because once you are in, you will not have unlimited time to search for answers.

Note: Unlike assignments which you will have a week to complete, **exams are only open for 4 days. Watch for due dates on exams carefully!**

Classwork expectations:

Please complete all of the required work and submit it on time via the Moodle classroom. Late work is not accepted. Make sure your work is your own, in your own words, **even** if you studied and worked with someone else. Identical assignments will **not** be accepted and suspicion of cheating will be reported to the dean. Likewise, copy/pasting information from the internet on any of your written work will be considered plagiarism, and will result in serious consequences.

100 – 90% A
89 – 80% B
79 – 70% C
69 – 60% D
59 or below F

Grading: Exams (10, 60, 60, 100)	230 points
Forum Discussions (5ea)	50 points
Labs (10ea)	90 points
Video Worksheets (5ea)	100 points
<u>Activities (5ea)</u>	<u>30 points</u>
Total-----	500 points

Other Possible Grades: A Y grade will not be assigned to any student who submits any work after the first week of classes. An incomplete grade (I) will only be considered if: the student has talked to me in advance, signed an agreement, has a valid reason for requesting it, **and** completed the majority of the work (80% or more) with a C or better grade.

Course Outcome: It is my hope that by the end of the term you will have an increased awareness and understanding of the basic geologic and meteorological processes that operate on the Earth in order to be informed citizens, to evaluate media statements and make informed decisions. In addition, I hope you will gain an appreciation of the workings of science and understand the natural forces and issues that affect Oregonians.

Diversity: The LBCC community is enriched by diversity. Each individual has worth and makes contributions to create that diversity at the college. Everyone has the right to think, learn, and work together in an environment of respect, tolerance, and goodwill. LBCC prohibits unlawful discrimination based on race, color, religion, ethnicity, use of native language, national origin, sex, sexual orientation, marital status, disability, veteran status, age, or any other status protected under applicable federal, state, or local laws.

Disability Accommodations:

LBCC is committed to inclusiveness and equal access to higher education. If you have approved accommodations through the Center for Accessibility Resources (CFAR) and would like to use your accommodations in this class, please talk to your instructor as soon as possible to discuss your needs. If you think you are eligible for accommodations, but are not yet registered with CFAR, please go to <http://linnbenton.edu/cfar> for steps on how to apply for services. Online course accommodations may be different than in on-campus classrooms: it is important that you make contact with CFAR as soon as possible.

Textbook Study Tips:

- It is **important** that you read the pages assigned to you **before** attempting to do your homework. Your textbook is considered your basic starting point for course content.
- Vocabulary is critical to learning and communication in science. Key terms are in bold throughout your text. Glossary definitions for them are located in gray boxes on the sides of the pages in each chapter as they are introduced.
- Prep cards are located at the end of the book. There are prep cards for each chapter. Quiz yourself on the key terms and try your hand at the Discussion questions.
- ASK QUESTIONS! Jot down things you don't understand to ask me or your classmates in discussions. It's the best way to learn and I am always happy to help you.

Help with eLearning:

Tech Support: If you need technical support, contact the Student Help Desk, located in the Albany Main Campus Library.

[Student Help Desk:](#)

541-917-4630 (voice)

541-704-7001 (text)

student.helpdesk@linnbenton.edu

Live support in the Albany main campus library:

Hours of operation: 8:00am - 7:00pm (M-Th) & 8:00am - 5:00pm (F).

Class Schedule

Week	Topic	Reading	Video and worksheets	Activities	Lab	Discussion topic
1	Minerals and Rocks, Volcanism	Chapters 1, 2 and 7	Earth Revealed: Minerals Intrusive Igneous Rocks; Volcanism	Crystallization first week (start)	Rock and Mineral Lab	Minerals, Ores and You
2	Geologic Time	Chapter 8	Earth Revealed: Geologic Time; Evolution Through Time	Geologic timeline	Radio-activity Lab	Rock Record
3	Plate Tectonics	Chapter 5	Earth Revealed: Birth of a Theory; Plate Dynamics		Plate Tectonics Lab	A Crazy Idea
4	Earthquakes	Chapter 6	Earth Revealed: Earthquakes Living with Earth- Part 1 (Loma Prieta Earthquake)	Epicenter location		Quake fatalities
5	Surface processes Exam 1	Chapter 3	Earth Revealed: Running Water, Groundwater		Porosity and Permeability Lab	Unique Properties of Water
6	Surface processes	Chapter 4	Glaciers; Wind, Dust and Deserts		Topographic Maps Lab	Erosion vs uplift

7	Oceans and ocean basins Exam 2	Chapters 9 and 10	Earth Revealed: The Seafloor; Waves, Beaches and Coasts		Oceans Lab	How oceans affect you
8	Atmosphere and weather	Chapters 11, 12, and 13	Habitable Planet: Oceans Earth's changing climate	Water cycle and cloud formation	Weather Lab	Climates and Change
9	Climate change and energy resources	Chapter 14	Earth Revealed: Living with Earth part 2 Preserving the Legacy Habitable Planet: Energy challenges	Comparing energy resources	Climate Change Lab	Energy
10	Astronomy Final Exam	Chapter 15	Earth Revealed: The Restless Planet		Solar System Lab
